

# State Administration of TCM of China Certified:

## Moxibustion Rediscovered Seminar

*Three Days with Dr. Chen Rixin in Edmonton*

November 23-25, 2018

*Proudly Presented by: S.N.A.P.T.C.M.*

北美中医药发展促进中心

### Did you know:

Moxibustion can be performed with minimal odor and smoke?

Moxibustion has its own unique points, that differ from acupuncture points?"

Moxibustion has its own independent theories - not taught in TCM Universities, yet?"

Moxibustion has its own unique sensations, both local and distal?"

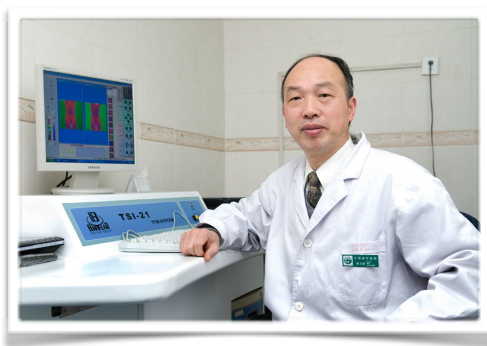

Moxibustion can clear Heat?"

Moxibustion is a complete treatment system, not an adjunct to acupuncture?"

### Why is Heat Sensitive Moxibustion founded by Dr. Chen Rixin so Revolutionary?

If one studies what is written about moxibustion in the Classics of Chinese medicine it will be apparent that something has been lost in the way the it is taught and practiced, both in China and abroad. When we read in the Yellow Emperor's classic statements like: "Use Fire to Tonify; Use Fire to Reduce", and that "heat can clear heat" it is clear that a deep understanding of moxibustion is missing. In schools moxibustion is taught as an adjunct to acupuncture where you might use moxa as a replacement for needles rather than a unique system unto itself. Dr. Chen Rixin's Heat Sensitive Moxibustion system is a return to the original understanding of moxibustion.
